Company Profile

Established in 1998, Metal Developers is led by professional team having cumulative experience in fabrications, erections and construction works. Our fabrication services offer top-quality engineering solutions that meet the needs of various industries, including communication, power transmission, and renewable energy. Our team of experienced engineers and fabricators use state-of-the-art equipment and advanced techniques to ensure that our engineering works are built to the highest standards. We offer a wide range of tower fabrication options, including custom designs and materials, to meet the unique needs of each project. Our tower fabrication process is carefully planned and executed to ensure that projects are completed on time and on budget, with the highest level of safety and quality. We have a strong track record of successful tower fabrication projects, with satisfied clients in a variety of industries. From design to installation and testing, we provide comprehensive tower fabrication services that are tailored to the specific needs of each project. Our commitment to quality, safety, and customer satisfaction sets us apart from other tower fabrication companies in the industry. We are dedicated to using sustainable materials and practices in our tower fabrication process, in order to minimize our impact on the environment. Whether you need a tower for communication, power transmission, or renewable energy, we have the expertise and resources to deliver a solution that meets your needs. Contact us today to learn more about our tower fabrication services, and how we can help you achieve your project goals.

Company History

Metal Developers is a tower fabrication and mechanical engineering company that has been providing high-quality services since 1998. The company has a long-standing reputation for excellence, reliability, and innovation in the industry. Metal Developers specializes in tower fabrication, creating custom-designed towers for a variety of applications, including communication, power transmission, and renewable energy. The company has a team of skilled engineers and fabricators who use the latest technology and materials to create towers that are safe, durable, and functional. Metal Developers has completed numerous tower fabrication projects over the years, ranging from small-scale installations to large-scale projects. Over the years, Metal Developers has built a reputation for excellence in the industry. The company is known for its commitment to quality, safety, and on-time delivery, ensuring that clients can rely on them to deliver the best possible results. Metal Developers is also known for its ability to customize its services to meet the specific needs and requirements of its clients. Metal Developers has a state-of-the-art fabrication facility, equipped with the latest equipment and technology. The company is committed to staying at the forefront of the industry, constantly updating its equipment and techniques to ensure that it can deliver the best possible results to its clients. Overall, Metal Developers is a highly respected tower fabrication and mechanical engineering company that has been providing high-quality services since 1998. The company's commitment to excellence, innovation, and customer satisfaction has made it a leader in the industry.

Engineering Sector

1. Mech. Fabrication & Erection
2. Civil Construction
3. Telecommunication Tower Services
4. Power Transmutation Line Services
5. Galvanizing Plant
6. Pharmaceutical Plants Industries
7. Industrial Wire Mesh
8. Solar Panel Structure
9. Transmission Line
10. Poultry Industries Steel Control Shed
11. General Fabrications
12. Road Sign Gentries & Pedestrian Steel Bridge
13. All Kind of Street Light Pole
14. Flag Pole

Why the Metal Developer is the Best Choice

- 1- The competent personnel for fabrication erection and civil construction.
- 2- Qualified and well trained fabrication engineers.
- 3- Having developed and well organized separate units for fabrication and galvanizing.
- 4- Comparatively maximum production and out-put rate.
- 5- Full back-up support to the clients from beginning to the end at any project.
- 6- Supply of fabricated material and completion of civil construction according to the time commitment.
- 7- Supply of fabricated quality steel to everybody as per their technical requirements and satisfaction.
